

I Respectfully urge the FCC to reject the NAB's petition 04-160. Satellite radio offers me and my family choices and selections that until now have not been available to us. The mundane and boring programing on traditional radio is mind-numbing. The local traffic and weather reports are at a push of a button, real 21st century stuff. I pay for these services and strongly believe (like millions of others) that government should stay out of private commerce.
